Solid Surfaces

HYGIENIC, SAFE AND BEAUTIFULLY  
VERSATILE KITCHEN SURFACES

# THE GREAT ESCAPE

Long gone are the days where the kitchen was simply a place to prepare food and devour meals. For many of us it's now the beating heart of the home, here you relax and unwind with family and friends.

It's a stylish getaway where you can battle boredom with board games, catch up with the news and turn your star baker dreams into a reality. And it's where you can simply escape from the outside world over a fresh cuppa or glass of Pinot. In fact, in many ways it's become the new living room. And what better way to bring it truly alive than with a stylish Staron® makeover?

# HOME, SAFE, HOME

Let's be honest, maintaining a completely hygienic, clean and safe home environment has now taken on a whole new level of importance. That's why Staron® surfaces make such sense. Not only will they keep you and your loved ones safer thanks to their super hygienic and waterproof design, they'll let you use the kitchen in the way it should always be used – with a healthy dollop of fun.

## STARON IS 100% WATERPROOF

Because Staron surfaces are completely non-porous, water bound viruses and bacteria cannot develop within the surface. So when you thoroughly wipe clean your Staron surfaces you can be confident you're making them completely hygienic again.

## STARON IS COMPLETELY SEAMLESS

Some worktop materials have visible joints where viruses and bacteria can develop. Staron solves this issue by being seamless, without any conspicuous joints. What's more, because all Staron surfaces, sinks and bowls can be installed together completely joint-free they're naturally smoother and easier to keep spotlessly clean.

## STARON IS MADE FROM SAFE MATERIALS

Unlike some worktop surfaces, Staron is made of completely safe materials. It's one of the reasons it's NSF-51 food-safe accredited. Food for thought, we're sure you'll agree.

Certified to NSF/ANSI 51

# ABOVE AND BEYOND

VERSATILE STARON® SURFACES

While Staron provides a resourceful choice throughout the entire kitchen, it's entirely up to you where you choose to use it. Will you seamlessly match every seamless surface? Take the opportunity to boldly experiment with contrasting colours? Or opt for a less is more approach? Whatever you have in mind for your dream kitchen living space, with the help and expertise of your kitchen designer you'll be able to bring it thoughtfully to life at whatever size and shape you require.

Take a look over the page to see how Staron can be used to striking effect by your kitchen designer on everything from worktops and island units to splashbacks and windowsills.

11

1

### SEAMLESS STARON® WORKTOPS

Two Staron® worktops have been joined to create this corner feature. Thanks to their seamless design, Staron® worktops like this one provide a highly sculptured finish that's super hygienic and a breeze to keep clean. And thanks to their highly durable design, they'll look their best for years to come.

2

### SEAMLESS SINK AND DRAINER GROOVES

This Staron® Hari Bright White sink has been seamlessly joined to the Staron® Peak worktop to create an ultra-waterproof and hygienic wet area. Drainer grooves have been added to keep everything dry without any loss of performance or quality, while the Peak décor still looks great even within the grooves. You can also choose from a number of groove styles, from chevrons to parallel.

3

### UPSTANDS AND SPLASHBACKS

Every kitchen is prone to the odd saucy spillage or splash. That's where these 12mm thickness upstands and splashbacks come in handy. A modern and cost-effective alternative to traditional tiles, they can be seamlessly joined to the worktop and perfectly colour matched by choosing the same décor. And as ever, they're a doddle to keep clean.

4

### STARON® CHOPPING BOARD

Sometimes the simplest ideas are the best. This stylish and highly practical accessory uses the same Staron® décor as the other components in the kitchen, providing the perfect surface to practice your knife skills on without damaging your other surfaces.

5

### HOB FITTED INTO STARON® WORKTOP SURFACE

It's fair to say no component in the kitchen works harder than a worktop, with appliances fitted beneath and sinks, taps and drainers fitted directly into the surface. In this example, both a hob and an extractor have been safely fitted within the Staron® worktop surface. The worktop trivet will safely disperse the heat from pans that have just come off the hob.

6

### POP-UP PLUG

Power when you need it, extra space when you want it. That's the beauty of this pop-up device, which can be pushed up when you need to plug in then popped down out of sight when the decks need clearing.

7

### WIRELESS SMART DEVICE CHARGER

In our always-on world, keeping your smart devices fully charged is increasingly essential. That's where this ingenious wireless charger comes into play. Seamlessly installed beneath the surface of the breakfast bar, it's safe, easy to use and super energy efficient. Simply place your smart device on the illuminated charge point to give your battery a boost. *Please check with your installer that your device is compatible.*

8

### SHELVING

For added design harmony why not coordinate your shelves with the other Staron surfaces in your kitchen. In this example, 100mm Staron has been used to create a super stylish floating shelf which has been seamlessly fitted to the Staron® splashback without the need of a visible standard shelf bracket. Every edge and surface of the shelf also features the same décor, ensuring it perfectly coordinates from every angle. And if you're looking to further optimise storage there's always the option of installing multiple shelves.

9

### SEAMLESS STARON® WINDOWSILL

There are few better examples of Staron's seamless and waterproof qualities than this windowsill. It's been seamlessly joined to the top of the upstand to create a waterproof seal across the window ledge. And as the same décor has been used it effortlessly ties the whole kitchen together. Clever stuff Staron®.

### CABINET FRAMING

This thoughtful addition is another perfect example of how you can bring further colour coordination and harmony into your kitchen and give yourself even more durable, easy to clean and hygienic surfaces to keep you and your family safe.

### DECORATIVE END PANEL

The gable end of the breakfast bar has a colour matched 40mm thickness Staron® decorative end panel. The result? A striking sculptured look that also protects the kitchen cabinet. And as with all Staron surfaces, the decorative end panel can be kept clean with a simple wipe.

### ALL ANGLES COVERED

Staron® can be designed with the same décor on both sides and all edges, delivering a completely colour coordinated effect. This is particularly handy when the underside of a surface is clearly visible, as is the case with the underside of this overhanging breakfast bar.

### MULTI-PURPOSE BREAKFAST BARS

Breakfast bars and island units have increasingly become a popular fixture in modern kitchens. Whether being used for hosting guests, prepping meals or playing games, you'll wonder how you ever lived without one. The breakfast bar shown here is 100mm thick, but you can choose from thicknesses as thin as 12mm. You'll also spot the open end of the breakfast bar is curved to prevent anyone banging into a sharp corner. Thoughtful and practical, textbook Staron®!

### 100% WATERPROOF

While spillages are inevitable in a kitchen, they're no cause for concern as unlike many other worktop materials Staron's non-porous and highly durable design is 100% waterproof.

### SHAPING THE FUTURE

While Staron® is a natural choice for creating crisp design lines, its versatility also gives you the complete freedom to embrace unique shapes and contours. Take the curved lines on this breakfast bar for example, which not only add a sense of movement but also reduce the risk of diners hurting themselves on any sharp corners. There's also the option to have straight sided shapes with multiple angles.

### CHOOSE YOUR THICKNESS

With thicknesses ranging from as little as 12mm to as much as you need to bring your vision to life, you're able to create a unique and stylish kitchen design that fits perfectly around the needs of both the chef and the seated diners. For example, a 100mm breakfast bar and shelf can be seamlessly fitted to a 40mm worktop and a colour matched 12mm splashback and upstand respectively. Discuss with your kitchen designer which thicknesses best suit your dream kitchen.

# THE STARON® COLLECTION

We strongly believe inspiration comes in many forms. Or in the case of the Staron Collection, many many forms. You'll find 28 striking décors inspired by both nature and human endeavour, all handily grouped into six beautifully distinctive ranges.

## COLOUR COORDINATION

Few tools are more powerful to a kitchen designer than colour. However, when used without restraint it can quickly turn into a recipe for disaster. It's why we've made sure each of the 28 Staron décors are available for use on all surface components, from sinks and splashbacks to worktops and windowsills. That way your designer will be able to achieve a colour coordinated finish that feels instantly timeless.

### TUSCANY MARBLE RANGE

Drawing inspiration from the marbles quarried in the Tuscany region of Italy, these three marble-effect décors add instant glamour and gravitas to any kitchen.

### TRAVERTINE MARBLE RANGE

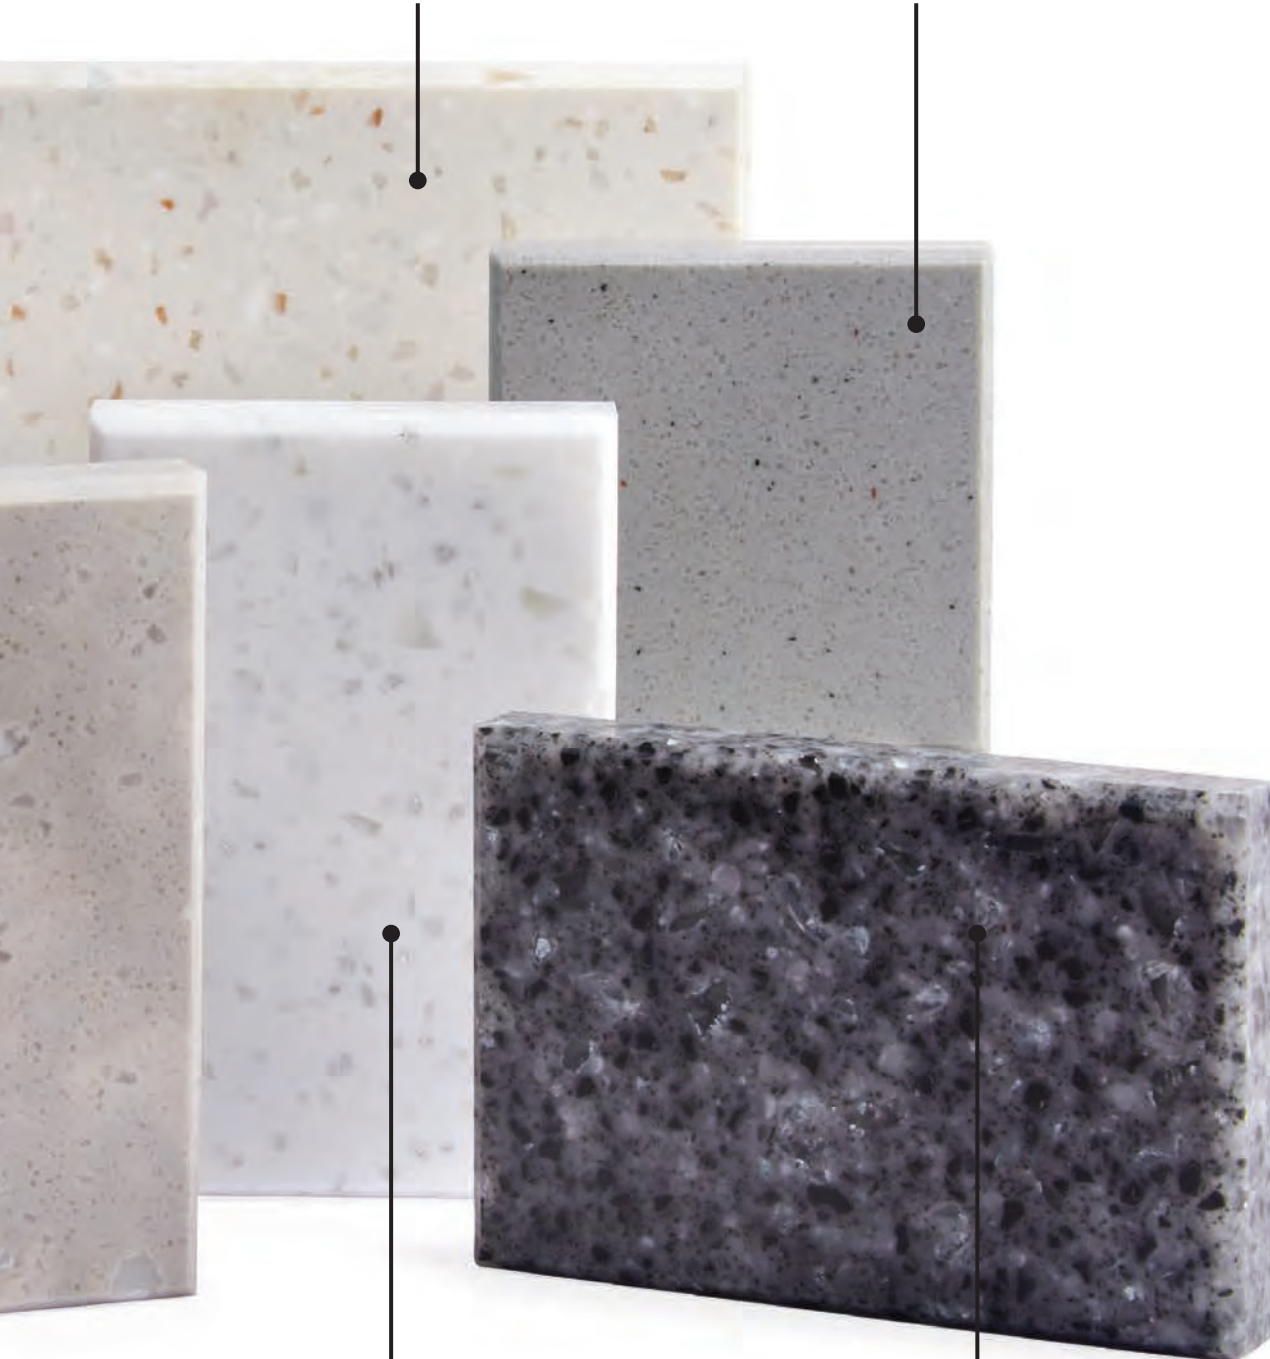

Each of the four décors in this range combines swirls of colour with the classic cloud-like veins so synonymous with marble.

## TERRAZZO RANGE

While rooted in tradition, terrazzo design is increasingly being embraced in modern kitchens. You'll find three distinctively different styles just a stone's throw away.

## DECORATIVE CONCRETE RANGE

This ever-present material in modern architecture is a natural choice for kitchens, as the weathered appearance of concrete cunningly hides the scratches that come with a bustling kitchen.

## WHITE STONE RANGE

There's a reason white remains a timeless colour choice in the kitchen. Naturally it brings added light and brightness, but it also creates the illusion of having more room to play with.

## GRANITE RANGE

Enjoy the sparkling grandeur of granite without the challenging maintenance of, well, granite. Seven granite effect décors are available, each providing a mesmerising lightshow from any angle.

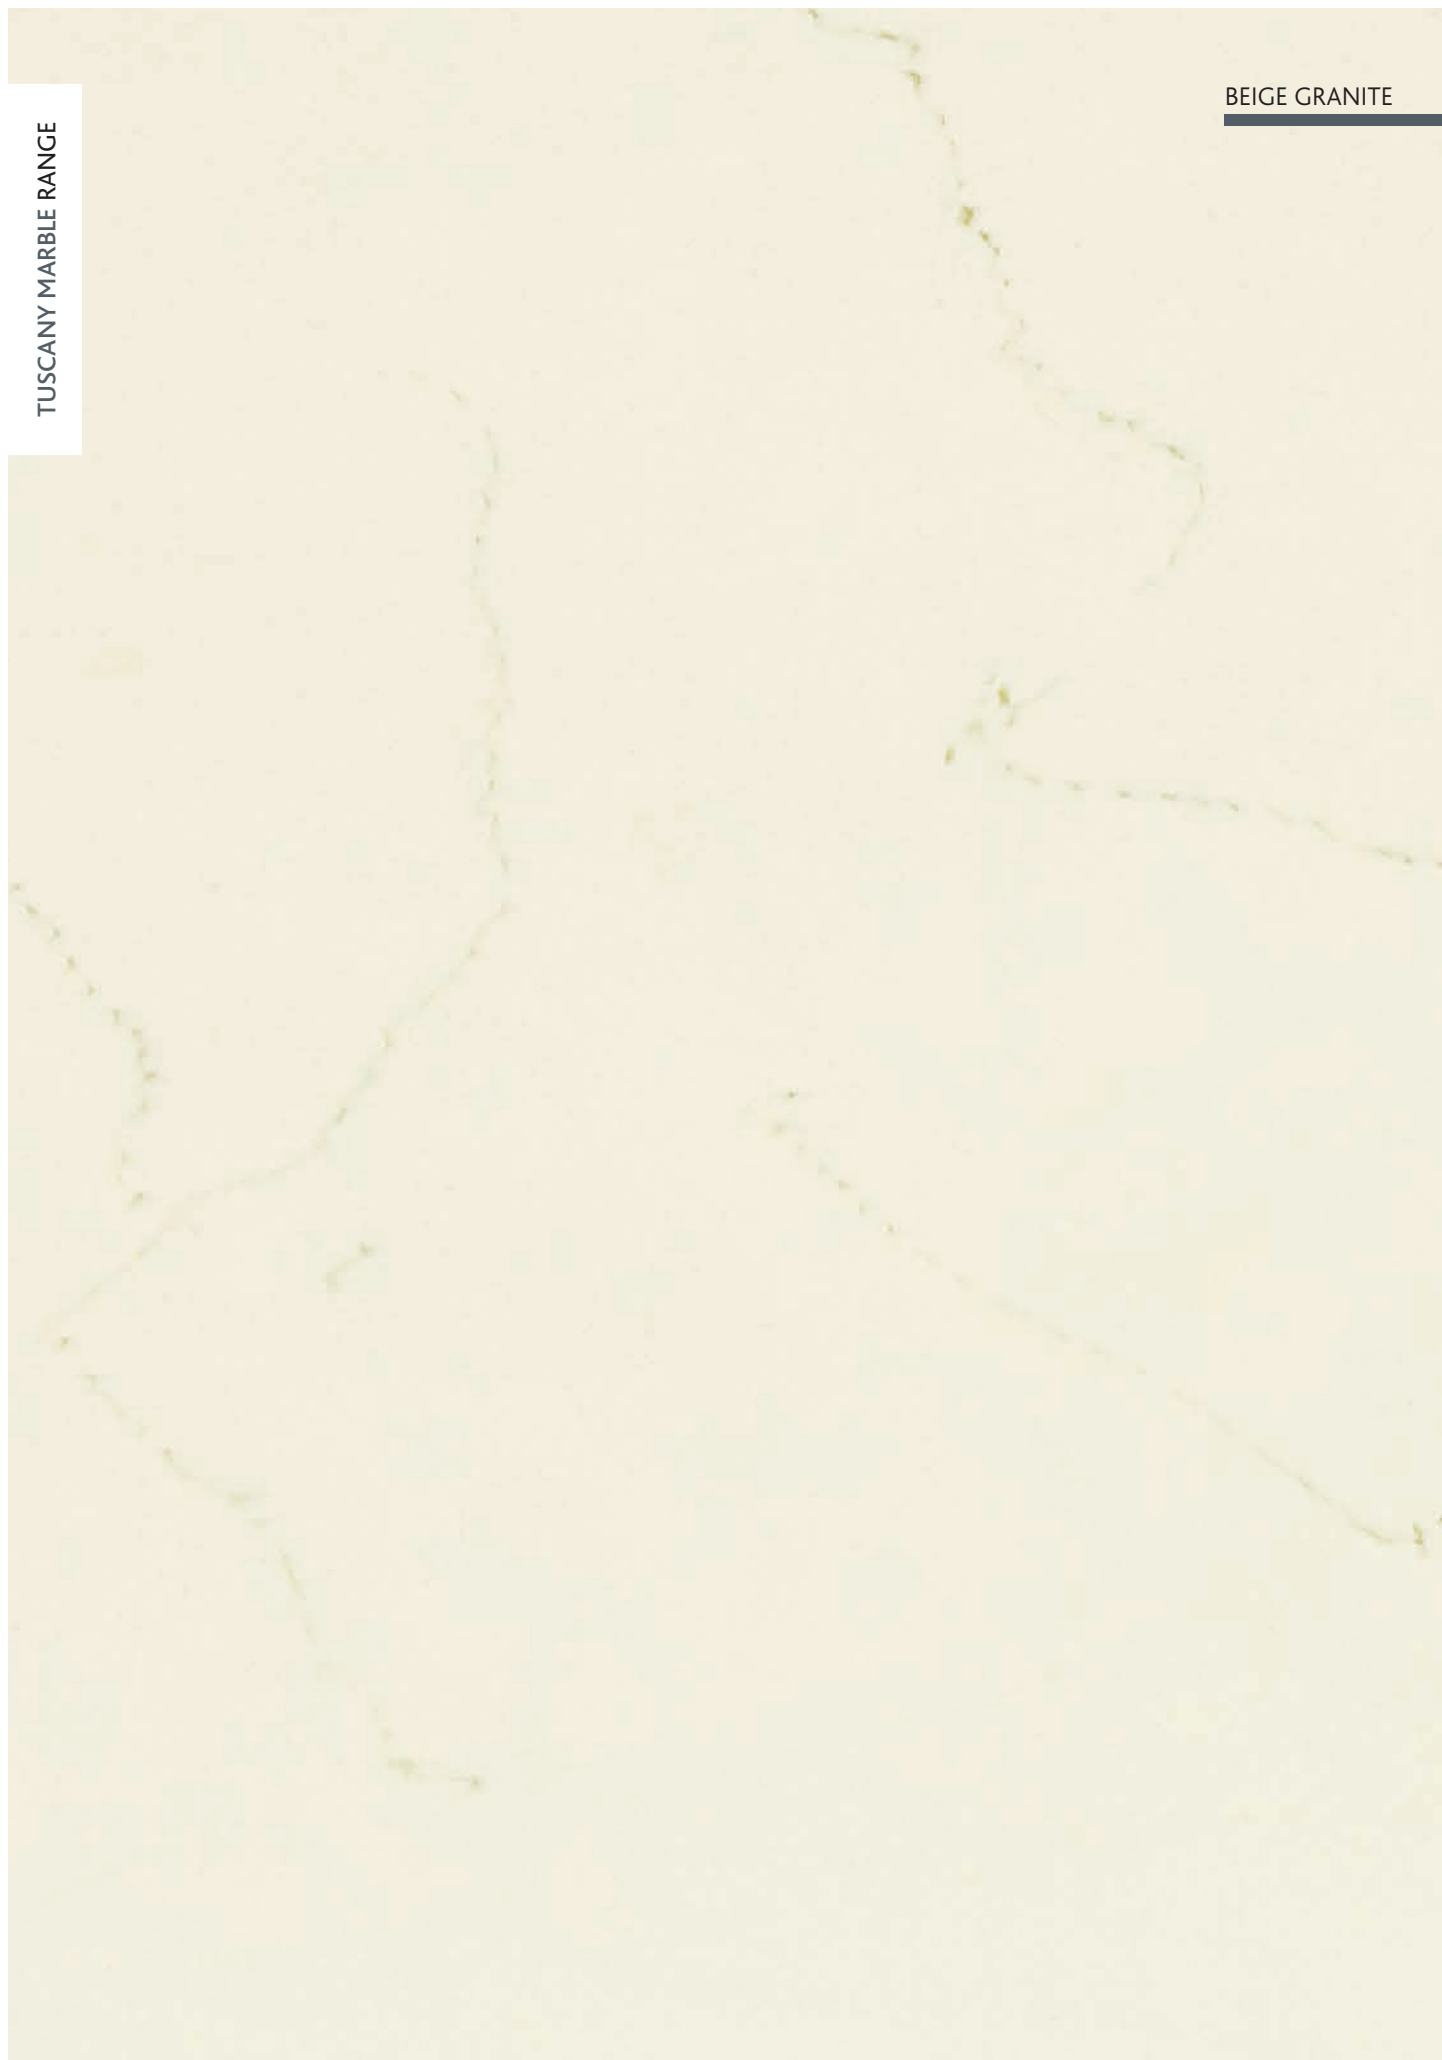

# TUSCANY MARBLE RANGE

There's confidence in restraint. Take the three marble effect décors in this range for example. Each features a subtle veining within the base colour that evokes the famous marbles quarried in Italy's Tuscany region. Whether opting for Beige Granite, Cotton White or Rotor Cloud, you'll be assured of a premium finish that screams quality without ever having to shout.

TUSCANY MARBLE RANGE

BEIGE GRANITE

COTTON WHITE

ROTOR CLOUD

# TRAVERTINE MARBLE RANGE

It's hardly surprising Travertine marble has been a go-to décor for hundreds of years. The eye-catching swirls of colours featured within the stone creates a compelling sense of movement, which is why we've created a Staron® range that beautifully captures the natural energy of the marble. Four décors are available to choose from, all of which perfectly complement most kitchen furniture colour schemes thanks to their natural and neutral hues.

# WHITE STONE RANGE

Brighter interiors. An always-new appearance. The illusion of more space. These are just some of the benefits that come from choosing a white décor for your kitchen. You'll also find white is the ultimate neutral colour, making it a perfect partner for almost any colour scheme you have in mind.

If you're looking for a completely fresh look, our Bright White décor is sure to be your new best friend. For a slightly softer white tone, there's the options of Peak, Sanded Birch or Pebble Ice. You'll also find our ever-popular Cotton White décor included in the Tuscany Marble Range on page 14.

# GRANITE RANGE

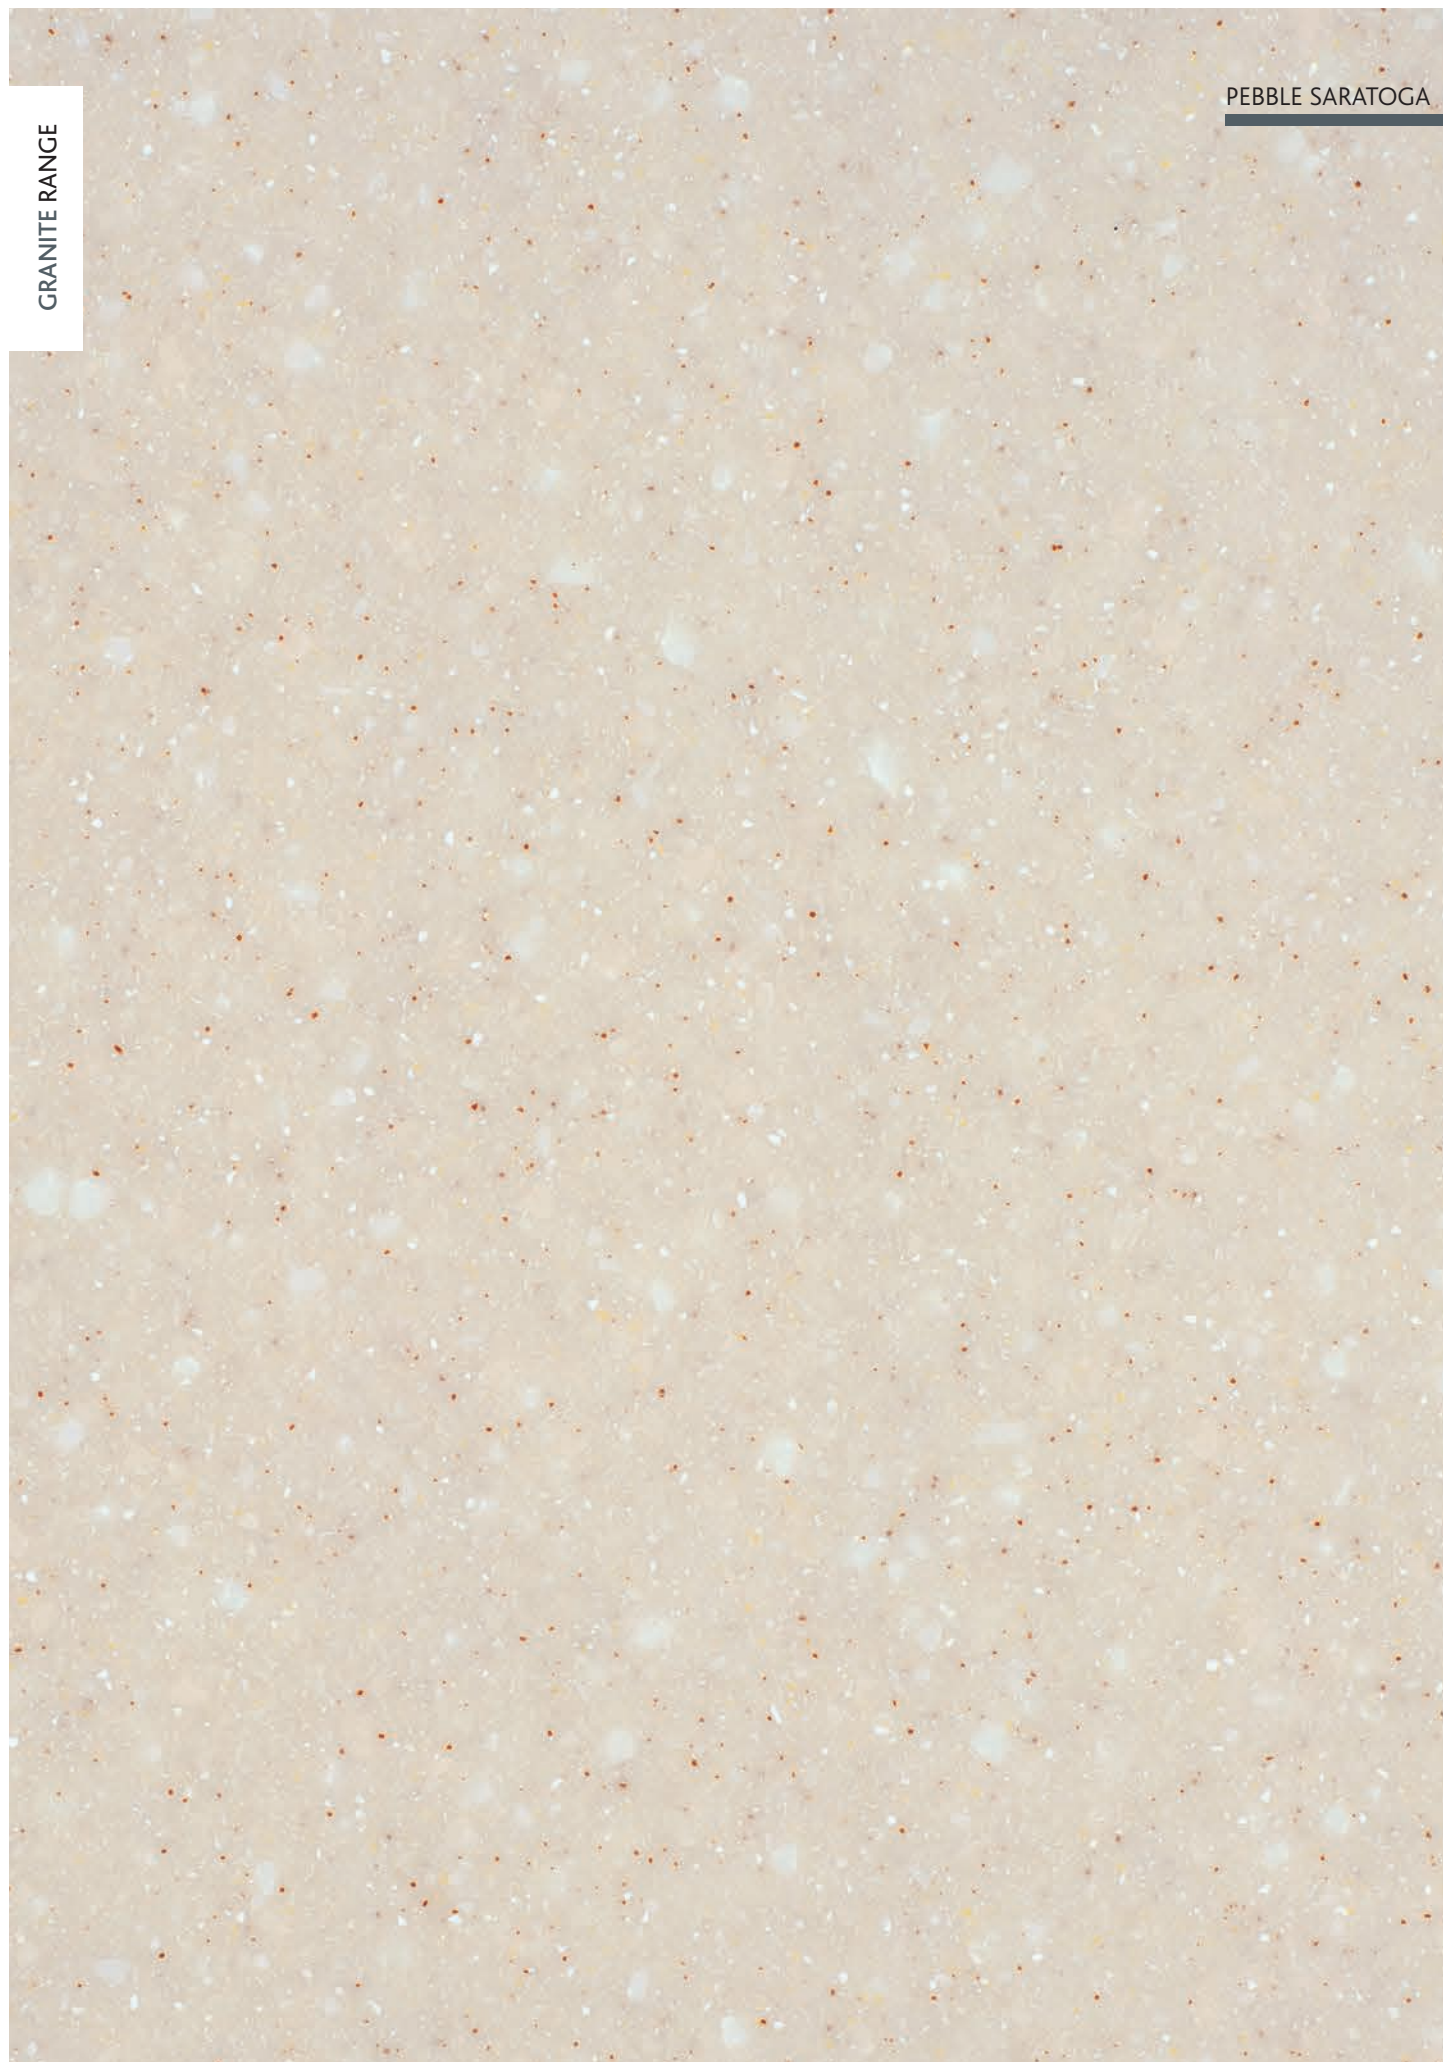

If it wasn't such a mouthful, we would have called this the Have Your Cake and Eat It Range. The reason? Every décor in the range combines the natural beauty of real granite with the easy maintenance, exceptional hygiene and seamlessness that comes with all Staron® solid surfaces. Then of course there's the way light playfully catches the quartz crystals under the surface of our Caviar, Genesis, Glimmer and Silvercloud options. The finished result is dazzlingly beautiful to view, and dizzyingly easy to maintain.

# TERRAZZO

## RANGE

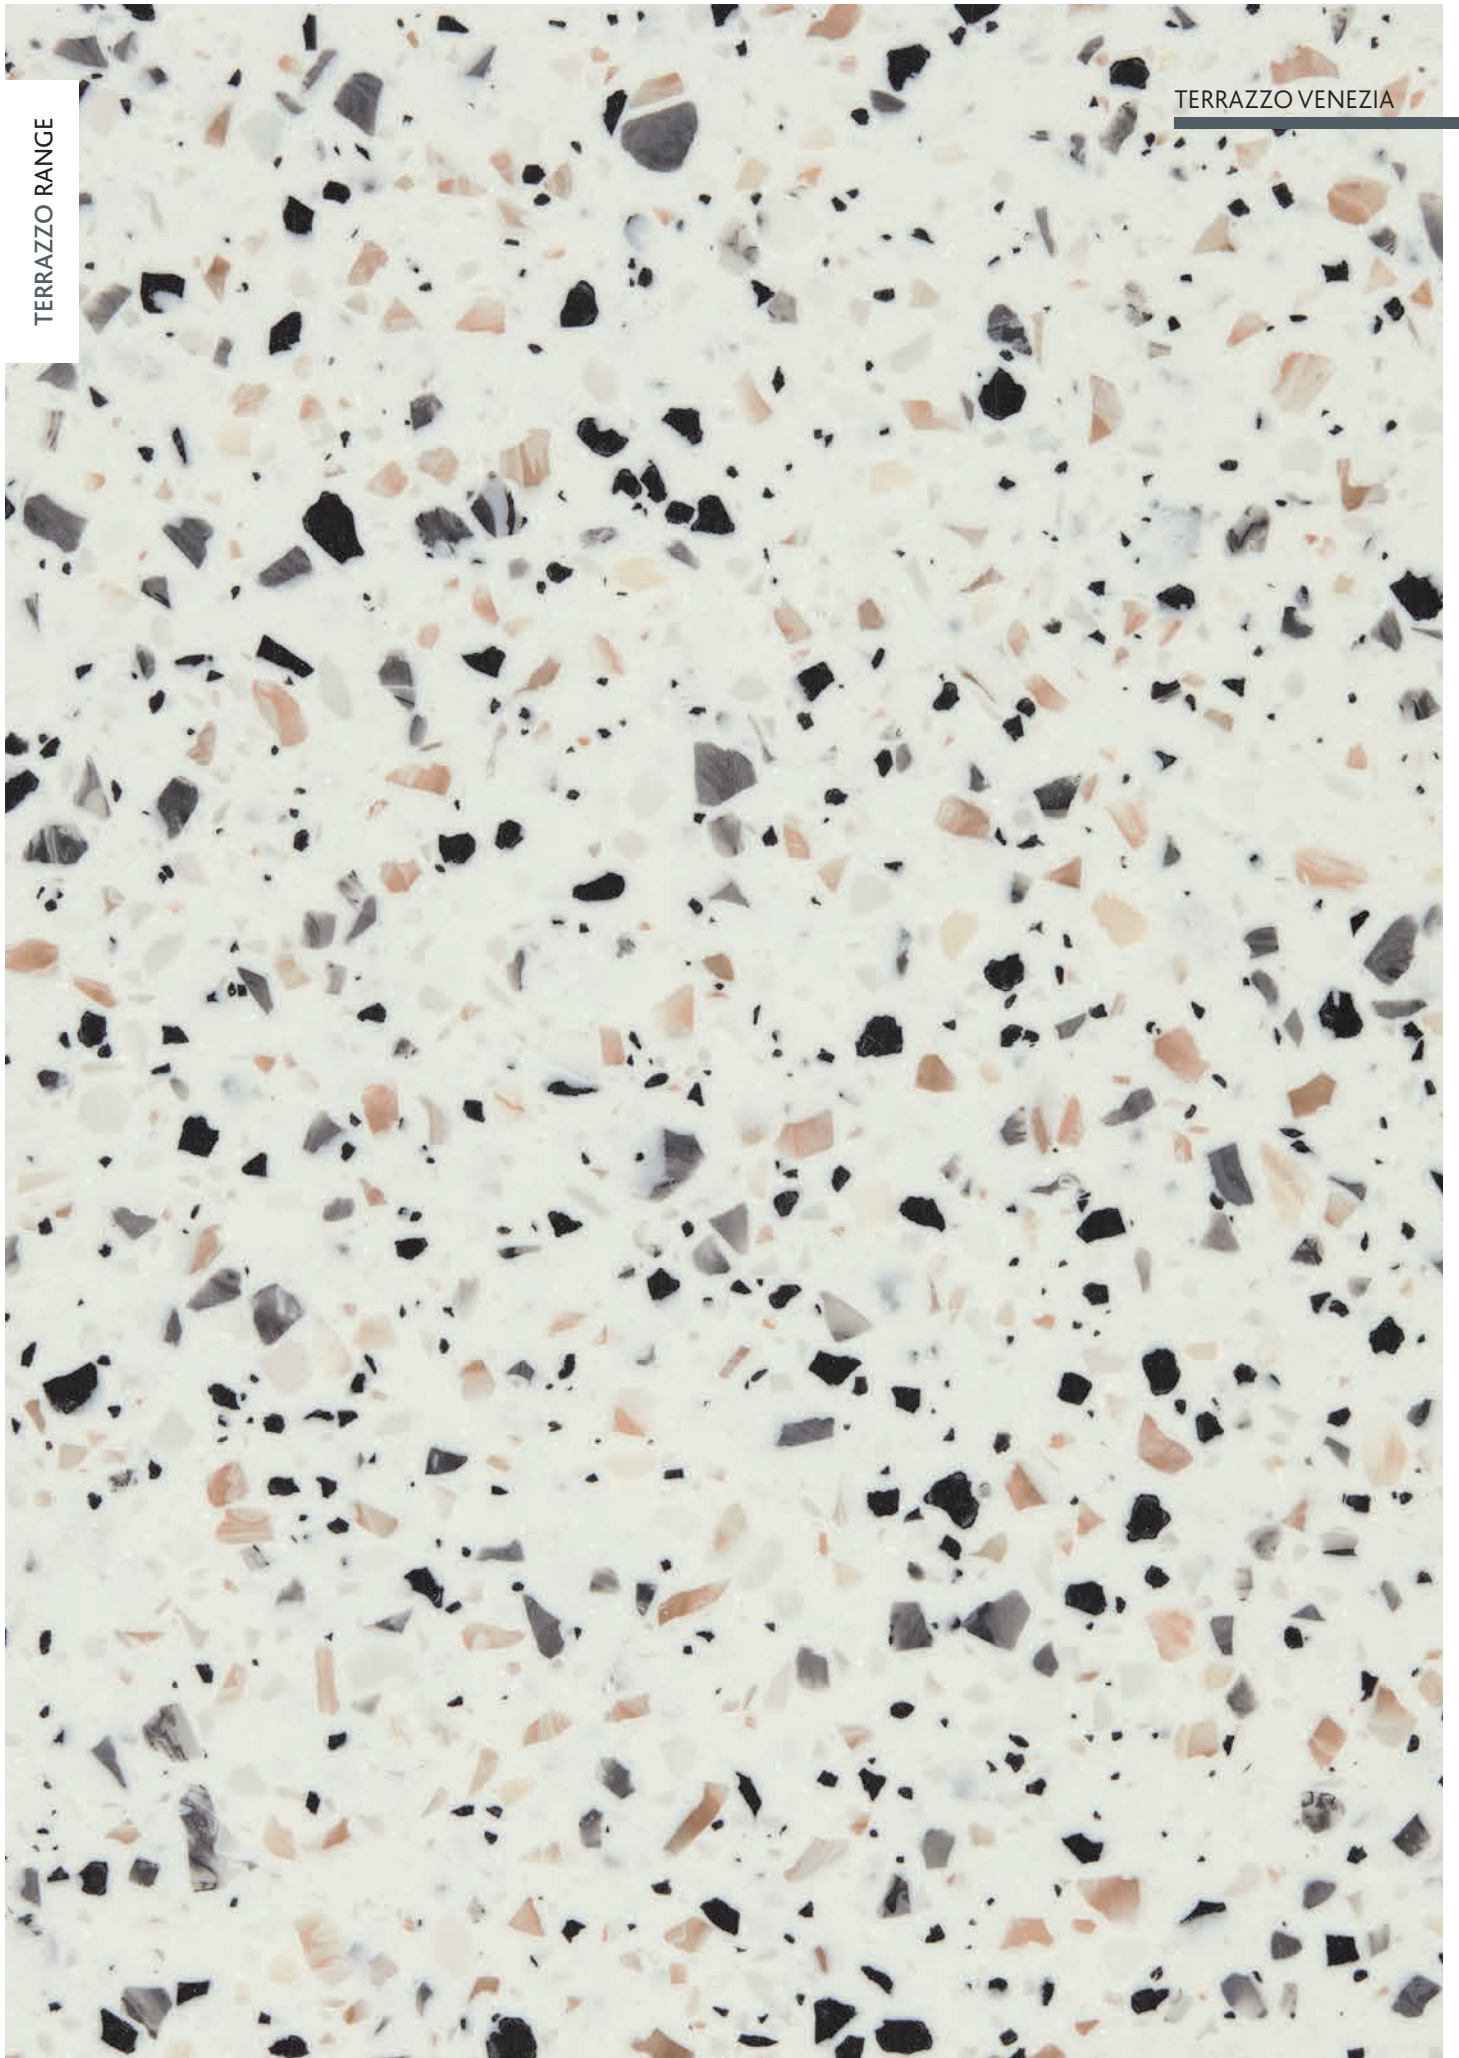

Create an instant talking point in the heart of your home with our mosaic-like Terrazzo décors. Each of the three geometric finishes available allows you to effortlessly add little splashes of colour to your kitchen, while the natural randomness of the pattern is ideal for disguising the everyday scratches and scuffs that inevitably occur in a busy kitchen.

### DÉCOR SAMPLE IMAGE SCALE

Each Staron® décor is shown with a 1:2 scale close-up image.  
Full sheet décors are shown at an approximate scale of 1:30.

- ❖ Dark colours and high gloss finishes will potentially show scratches over time if a worktop saver is not used. Please note, scratches or abrasion marks are not covered under the Staron 10-year limited homeowner warranty. Should you wish for scratches to be removed, the surface can be re-sanded and re-finished by an authorised Staron fabricator / installer who will charge you an hourly service rate. For simple tips on keeping your dark and high gloss surfaces looking their best, simply refer to our 'How to care for your Staron® surfaces' leaflet.
- ❖ These colours contain pearl particulates that are shaped flat and float on the surface. Due to the unique distribution in production, these particulates come with directional pattern and as such reflections may vary depending on light and view angles.

While every effort has been made to accurately represent the décors within this brochure, we're unable to guarantee an exact match due to the limitations of the printing process. Please view actual sample prior to selection. Before installing your Staron surface, please check batch numbers are the same to ensure a complete colour match.

## BESPOKE SINKS AND BOWLS

Seamless sinks and bowls can also be formed using any of the Staron® décors available in the UK and Ireland. These specially ordered sinks can either be colour matched to the surrounding Staron surfaces or provide a striking visual contrast. The choice, as ever, is yours.

The image shown here demonstrates another special design. It's seamlessly using Staron Zenith from the Granite Range for all four sides, but in this case has a stainless steel base which is particularly resilient to boiling water being poured into the sink during cooking.

In this image, Staron Bamboo has been selected for the worktop and all four sides, as well as for the base of the sink to create a truly seamless and harmonious look.

- 10. Cabinet Framing
- 11. Open Cabinet Space

# A CUT ABOVE

While we may be experts in making kitchens look stunning, it's always been our view there's nothing more beautiful about a kitchen than seeing it used day in, day out. It's why every Staron® surface is designed to withstand years of splashes, spillages and splodges. And we're so confident Staron® is up to the task that we offer a **10-year limited homeowner warranty**. What's more, this warranty is fully transferable so you'll be able to pass it on should you ever sell your home in the future.

## SHARING IS CARING

We've produced a helpful leaflet called 'How to care for your Staron® surfaces' which provides detailed guidance on keeping your surfaces looking sharp. This leaflet also includes full details about our 10-year limited homeowner warranty.

For everyday care, general cleaning of your Staron® solid surfaces can be done by simply wiping the surface with a damp sponge or cloth and then drying with a dry soft cloth. We also recommend asking your Staron® supplier about the Care and Maintenance kit we offer to help keep your surfaces in tip-top condition.
